Table 1
Q.1 To what extent do you agree or disagree with the following statements about charity and charities?

Summary

Base: All respondents

		Statements					
		Charities play a vital role in my community	Given the current economic climate, I am concerned about the future of the UK's charities	Charitable donations from members of the public are key to allowing charities to continue their vital work	I have made a donation to charity in the past year (including money, donation of clothes, books etc.)	Gift Aid works on the principle that we shouldn't tax people on what they give to charity, and I believe that this is a good principle	The Government should do all it can to encourage charitable donations

Table 8

Q.2 The Government is proposing to introduce a cap on the tax relief that people making major donations to charity can claim. This has caused concern among charities, because donations may fall as a result. They estimate that they will lose up to £500m per year in donations. To what extent do you agree or disagree with each of the following statements?

Summary**Base: All respondents**

	Statements				
	There should be no cap on tax relief for charitable giving	I believe the proposed cap on charitable tax relief will have a negative impact on charitable giving	The proposed cap on charitable tax reliefs has negatively affected my opinion of the Government	The proposed cap on charitable tax reliefs contradicts the Prime Minister's vision of a "Big Society"	The Government should have considered the implications of the proposed cap on charitable tax reliefs more carefully before making the announcement

Table 9

Q.2 The Government is proposing to introduce a cap on the tax relief that people making major donations to charity can claim. This has caused concern among charities, because donations may fall as a result. They estimate that they will lose up to £500m per year in donations. To what extent do you agree or disagree with each of the following statements?

There should be no cap on tax relief for charitable giving

Table 11

Q.2 The Government is proposing to introduce a cap on the tax relief that people making major donations to charity can claim. This has caused concern among charities, because donations may fall as a result. They estimate that they will lose up to £500m per year in donations. To what extent do you agree or disagree with each of the following statements?

The proposed cap on charitable tax reliefs has negatively affected my opinion of the Government

Table 13

Q.2 The Government is proposing to introduce a cap on the tax relief that people making major donations to charity can claim. This has caused concern among charities, because donations may fall as a result. They estimate that they will lose up to £500m per year in donations. To what extent do you agree or disagree with each of the following statements?
The Government should have considered the implications of the proposed cap on charitable tax reliefs more carefully before making the announcement

Table 22
Q.4 To what extent do you agree or disagree with the following statements about charities and the Government?
Summary

Base: All respondents

	Statements				
	Charities play an important role in providing services that the Government does not or cannot provide	The services provided by charities are even more important in difficult economic times	The Government should work closely with charities in order to improve society	The Government should not pursue policies which could impact negatively on charitable giving	When making policy and legislation, the Government must consider their potential impact on charities
