Q.4 To what extent do you agree or disagree with the following statements?

Summary

Base: All respondents

	Statements									
	Young people today are the future for the recovery of the British economy	Young people today have abilities and talents that need to be celebrated	Young people today are skilled, especially in the use of technology	The reason that there is high youth unemployment is because businesses too often assume all young people are lazy and will not work hard	The main thing stopping young people finding work is their negative attitude to doing certain types of jobs	The media and politicians unfairly stereotype young people today as being lazy	Young people in the UK are generally hard-working	Public institutions such as the police have a negative impression of young people	I believe that young people today will achieve more in their working life than their parents	The current economic climate makes it very hard for young people to fulfil their potential
