## Councillors Survey June 2011

## Q1 - To what extent do you agree or disagree with each of the following statements?

The amount of housing benefit households receive should be based on rental costs in my local area, rather than a fixed rate of national inflation (which includes the prices of goods unrelated to housing)
Base: All respondents

## Councillors Survey June 2011

## Q1 - To what extent do you agree or disagree with each of the following statements?

## Summary table of mean scores

Base: All respondents

Unweighted Tota
Weighted Total

I do not support the scale of government cuts to housing benefit
Reductions in housing benefit will lead to an increase in homelessness in my area
Families moving as a result of reductions to housing benefit will create extra pressure on public services in my area such as schools, hospitals and advice and support services
My council does not have sufficient resources to cope with extra pressure on public services

The amount of housing benefit households receive should be based on rental costs in my local area, ather than a fixed rate of national inflation (which includes the prices of goods unrelated to housing) There will be significant knock-on costs to local councils due to reductions to housing benefit
