**Q.1 To what extent do you agree or disagree with each of the following statements about the provision of medicines in England?**

**Summary****Base: All respondents**

	Statements				
	The NHS should ensure that patients suffering with rare conditions have access to the widest possible range of medicines, regardless of cost	If I had a serious illness, being able to have the latest medicine would be a top priority for me	Patients in England should have a right to the same medicines that are available to people living in Scotland or Wales and vice versa	I think the Government should do more to make sure that people across the UK can get the latest medicines when they have a serious or life-threatening illness	If the NHS budget increases, then some of the extra money should be spent on providing the latest medicines rather than spent on other areas
