Q.1 To what extent do you agree or disagree with the following statements about charity and charities?

#### Summary

Base: All respondents

	Statements					
	Charities play a vital role in my community	Given the current economic climate, I am concerned about the future of the UK's charities	Charitable donations from members of the public are key to allowing charities to continue their vital work	I have made a donation to charity in the past year (including money, donation of clothes, books etc.)	Gift Aid works on the principle that we shouldn't tax people on what they give to charity, and I believe that this is a good principle	The Government should do all it can to encourage charitable donations

**Q.2 The Government is proposing to introduce a cap on the tax relief that people making major donations to charity can claim. This has caused concern among charities, because donations may fall as a result. They estimate that they will lose up to £500m per year in donations. To what extent do you agree or disagree with each of the following statements?**

**Q.2 The Government is proposing to introduce a cap on the tax relief that people making major donations to charity can claim. This has caused concern among charities, because donations may fall as a result. They estimate that they will lose up to £500m per year in donations. To what extent do you agree or disagree with each of the following statements?**  
**The Government should have considered the implications of the proposed cap on charitable tax reliefs more carefully before making the announcement**
