**Summary**

**Base: All respondents**

	Statements							
	I think the Government should do more to make sure that disabled or elderly people get the support they need to do everyday things like wash, dress and get out of bed in the morning	The Government is spending too much money supporting disabled or elderly people	A 15-minute visit is not long enough to support a disabled or elderly person to do everyday things like wash, dress and get out of bed in the morning	Disabled or elderly people should be grateful to receive free social care, even if only lasting 15 minutes	Disabled or elderly people have the right to receive social care visits which allow for enough time for care workers to give the appropriate support to do everyday things	15-minute care visits are an effective way to provide social care to a great number of disabled or elderly people	15-minute care visits must be frustrating for care workers, as they cannot do their job properly	15-minute care visits deprive disabled and elderly people of their dignity
