

# EAST SUFFOLK COUNCIL – SINGLE COUNCIL SURVEY

## METHODOLOGY NOTE

ComRes interviewed 1,000 adults aged 18+ living in Waveney District or Suffolk Coastal District Council areas by telephone between the 3<sup>rd</sup> and 14<sup>th</sup> October 2016. Quotas were set to ensure 500 adults were surveyed in each Council area. Data were weighted to be representative of all adults living in Waveney and Suffolk Coastal District Councils by age, gender, Council area, socio-economic grade (SEG) and ethnicity. Quotas were set to ensure a good spread of responses by Council ward and economic status (economically active/inactive). ComRes is a member of the British Polling Council and abides by its rules.

*All press releases or other publications must be checked with ComRes before use. ComRes requires 48 hours to check a press release unless otherwise agreed.*

To commission a voting intention poll or a public opinion survey please contact Tom Mludzinski, Director of Political Polling:

# East Suffolk New Council Survey

<p>Q1. I'd like to start by talking about your local area. What is it you like most about living in your local area? (Open text) .....</p> <p>Base: All respondents</p>	1
<p>Q2. And what is it you like least about living in your local area? (Open text) .....</p> <p>Base: All respondents</p>	3
<p>Q3. Before now, had you ever heard of the proposed creation of a single District Council for East Suffolk? .....</p> <p>Base: All respondents</p>	5
<p>Q4. And from which of the following sources, if any, have you heard about the proposals to create a single District Council for East Suffolk? .....</p> <p>Base: All who are aware of new single council proposal</p>	7
<p>Q5. Waveney District Council and Suffolk Coastal District Council are currently considering proposals to replace the two councils with a single District Council covering both areas. Both councils have been working in partnership since 2008, and most of their services are run together on behalf of both councils. In general, to what extent are you favourable or unfavourable towards the proposed creation of a single District Council for East Suffolk? .....</p> <p>Base: All respondents</p>	11
<p>Q6_SUM. I now want to talk about the impact of the proposed creation of a new, single District Council. As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils. The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way. A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings. Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area. Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk. For each one, please say how important, if at all, you feel it is that they achieve this objective. SUMMARY TABLE .....</p> <p>Base: All respondents</p>	13
<p>Q6_SUM. I now want to talk about the impact of the proposed creation of a new, single District Council. ## East Suffolk New Council Survey

**Q6\_SUM.** I now want to talk about the impact of the proposed creation of a new, single District Council.

As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils.

The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way.

A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings.

Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area.

Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk.

For each one, please say how important, if at all, you feel it is that they achieve this objective.

### SUMMARY TABLE

Base: All respondents

	Total	Very important	Fairly important	Not very important	Not at all important	Don't know	Net: Important	Net: Not important	Mean
Sustain the delivery of important services to local people	1000 100%	797 80%	163 16%	19 2%	8 1%	14 1%	959 96%	26 3%	3.8
Ensure that the new Council is better equipped to meet the future challenges facing local government, for example an ageing population and a reduction in central government funding	1000 100%	645 65%	253 25%	44 4%	15 2%	43 4%	898 90%	59 6%	3.6
Maintain low Council tax - currently there is only a 9p annual difference in Council tax between both Councils	1000 100%	593 59%	275 28%	80 8%	29 3%	23 2%	868 87%	109 11%	3.5
Keep council offices in both Waveney and Suffolk Coastal areas, ensuring residents continue to have access to services locally	1000 100%	594 59%	250 25%	99 10%	29 3%	28 3%	844 84%	127 13%	3.5

## East Suffolk New Council Survey

**Q6\_SUM.** I now want to talk about the impact of the proposed creation of a new, single District Council.

As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils.

The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way.

A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings.

Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area.

Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk.

For each one, please say how important, if at all, you feel it is that they achieve this objective.

## East Suffolk New Council Survey

### Q6\_2. I now want to talk about the impact of the proposed creation of a new, single District Council.

As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils.

The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way.

A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings.

Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area.

Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk.

For each one, please say how important, if at all, you feel it is that they achieve this objective.

### Keep council offices in both Waveney and Suffolk Coastal areas, ensuring residents continue to have access to services locally

## East Suffolk New Council Survey

**Q6\_3. I now want to talk about the impact of the proposed creation of a new, single District Council.**

As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils.

The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way.

A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings.

Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area.

Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk.

For each one, please say how important, if at all, you feel it is that they achieve this objective.

**Maintain low Council tax - currently there is only a 9p annual difference in Council tax between both Councils**

Base: All respondents

## East Suffolk New Council Survey

**Q6\_5. I now want to talk about the impact of the proposed creation of a new, single District Council.**

As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils.

The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way.

A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings.

Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area.

Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk.

For each one, please say how important, if at all, you feel it is that they achieve this objective.

## East Suffolk New Council Survey

**Q6\_6. I now want to talk about the impact of the proposed creation of a new, single District Council.**

As I mentioned earlier, this survey is about the proposed creation of a new single District Council for East Suffolk, replacing Waveney and Suffolk Coastal District Councils.

The councils have already saved around 16 million pounds since 2010 by working in partnership, but say they have reached the limit of new savings that can be achieved this way.

A new single District Council for East Suffolk would deliver an estimated 1.3 million pounds per year of extra budget savings.

Some people believe that the new council will be more efficient and that delivery of services to residents will not be impacted by the change. However, others say it might lead to less political accountability as there will be fewer councillors covering a bigger area.

Now that I have provided more background, I'm going to read out a list of objectives that the Councils' believe they can achieve by creating a single District Council for East Suffolk.

For each one, please say how important, if at all, you feel it is that they achieve this objective.

**Ensure that the new Council is better equipped to meet the future challenges facing local government, for example an ageing population and a reduction in central government funding**

Base: All respondents
