

Topical Questions – w/c 1 February 2021

Savanta ComRes interviewed 2,347 UK adults online from the 29 to 31 January 2021. Data were weighted to be demographically representative of all UK adults. Data were weighted to be representative of UK adults aged 18+ by age, gender, region and other socio-economic characteristics. Savanta ComRes is a member of the British Polling Council and abides by its rules. Full tables at www.comresglobal.com.

QCVIMQ58. The Government has set a target to offer vaccination slots to 15 million in the top four priority groups to receive the Coronavirus vaccine - including all over-80s - by 15 February. To what extent do you feel confident or unconfident that they will hit this target? BASE: All respondents	1
QCVIMQ59. Thinking about the penalties given for people who break Coronavirus rules during lockdown, to what extent do you think they are too tough, too soft or about right? BASE: All respondents	4
QCVIMQ60. And thinking again about the penalties given for people who break Coronavirus rules during lockdown, to what extent do you think they are well or poorly enforced? BASE: All respondents	7
QCVIMQ54. Now a Covid-19 vaccine has been approved by the UK regulator, how keen or reluctant are you to receive the vaccine? BASE: All respondents	10
QCVIMQ55. Due to the urgency of the COVID-19 pandemic, developing the COVID-19 vaccine has been a priority for the healthcare sector. Despite still passing through all the regular checks and approvals, including from the UK's vaccine regulatory body, it has been developed and will be distributed faster than a traditional vaccine. To what extent are you comfortable or uncomfortable with the COVID-19 vaccine having been developed, checked and distributed at a faster pace than normal? BASE: All respondents	13
QCPRW45Q22. The UK will now leave up to 12 weeks between the first and second doses of the Coronavirus vaccine, rather than giving both within 21 days as was originally planned. Some have expressed concerns at the delay between the two doses, with some concerns over the effectiveness of the second dose one of the UK's two approved vaccines after that period of time, as well as uncertainty regarding vaccine supply levels after a 12-week window. However, the UK's chief medical officers say that the first dose of the vaccine is the most important for protection against Coronavirus, and it is more important to vaccinate more people with one dose, than fewer people with both. To what extent does or does not the decision to delay the second dose of the vaccine from 21 days to 12 weeks concern you? BASE: All respondents	16
QCPRW45Q23. There are due to be local elections in England, as well as devolved elections in Scotland, Wales and London, in May this year. Some say that the elections should go ahead as planned, but others say that they should be postponed due to the pandemic. Which of the following is closest to your view? BASE: All respondents	19
QCPRW45Q26. Which of the following do you hold most responsible for the rise in Coronavirus cases in 2021? BASE: All respondents	22
QCPRW45Q27. When do you think that all coronavirus restrictions will be lifted in the UK? Sometime in... BASE: All respondents	25

PR Qs 1st Feb 2021

QCVIMQ55. Due to the urgency of the COVID-19 pandemic, developing the COVID-19 vaccine has been a priority for the healthcare sector. Despite still passing through all the regular checks and approvals, including from the UK's vaccine regulatory body, it has been developed and will be distributed faster than a traditional vaccine. To what extent are you comfortable or uncomfortable with the COVID-19 vaccine having been developed, checked and distributed at a faster pace than normal?

PR Qs 1st Feb 2021

QCVIMQ55. Due to the urgency of the COVID-19 pandemic, developing the COVID-19 vaccine has been a priority for the healthcare sector. Despite still passing through all the regular checks and approvals, including from the UK's vaccine regulatory body, it has been developed and will be distributed faster than a traditional vaccine. To what extent are you comfortable or uncomfortable with the COVID-19 vaccine having been developed, checked and distributed at a faster pace than normal?

PR Qs 1st Feb 2021

QCPRW45Q22. The UK will now leave up to 12 weeks between the first and second doses of the Coronavirus vaccine, rather than giving both within 21 days as was originally planned. Some have expressed concerns at the delay between the two doses, with some concerns over the effectiveness of the second dose one of the UK's two approved vaccines after that period of time, as well as uncertainty regarding vaccine supply levels after a 12-week window. However, the UK's chief medical officers say that the first dose of the vaccine is the most important for protection against Coronavirus, and it is more important to vaccinate more people with one dose, than fewer people with both. To what extent does or does not the decision to delay the second dose of the vaccine from 21 days to 12 weeks concern you?
