Topical Questions – w/c 8 February 2021

Savanta ComRes interviewed 2,119 UK adults online from the 5 to 7 February 2021. Data were weighted to be demographically representative of all UK adults. Data were weighted to be representative of UK adults aged 18+ by age, gender, region and other socio-economic characteristics. Savanta ComRes is a member of the British Polling Council and abides by its rules. Full tables at **www.comresglobal.com**.

PR Qs 8th Feb 2021

QCVIMQ55. Due to the urgency of the COVID-19 pandemic, developing the COVID-19 vaccine has been a priority for the healthcare sector. Despite still passing through all the regular checks and approvals, including from the UK's vaccine regulatory body, it has been developed and will be distributed faster than a traditional vaccine. To what extent are you comfortable or uncomfortable with the COVID-19 vaccine having been developed, checked and distributed at a faster pace than normal?

BASE: All respondents

PR Qs 8th Feb 2021

QCVIMQ55. Due to the urgency of the COVID-19 pandemic, developing the COVID-19 vaccine has been a priority for the healthcare sector. Despite still passing through all the regular checks and approvals, including from the UK's vaccine regulatory body, it has been developed and will be distributed faster than a traditional vaccine. To what extent are you comfortable or uncomfortable with the COVID-19 vaccine having been developed, checked and distributed at a faster pace than normal?

PR Qs 8th Feb 2021

QCPRW45Q22. The UK will now leave up to 12 weeks between the first and second doses of the Coronavirus vaccine, rather than giving both within 21 days as was originally planned. Some have expressed concerns at the delay between the two doses, with some concerns over the effectiveness of the second dose one of the UK's two approved vaccines after that period of time, as well as uncertainty regarding vaccine supply levels after a 12-week window. However, the UK's chief medical officers say that the first dose of the vaccine is the most important for protection against Coronavirus, and it is more important to vaccinate more people with one dose, than fewer people with both. To what extent does or does not the decision to delay the second dose of the vaccine from 21 days to 12 weeks concern you?
