QCP10. The NHS Standard Contract is used by commissioners for all healthcare services other than primary care.
The contracts for 2016/17 and 2017-19 include new requirements for hospitals which aim to help reduce the administrative workload of GP practices (for example, relating to discharge summaries, clinic letters, medication on discharge, onward referrals and shared care protocols).
Before today, how much, if anything, would you say you knew about these changes?
Base: All respondents

QWF6. Please indicate which, if any, of the below you have access to for patients at your practice. By 'access', we mean the practice where you work has access to the services of somebody in this role for the benefit of patients. The staff may not be directly employed by the practice, but could be, and may work across several practices. This could also include access for patients at your practice via a self-referral service.
