

ROYAL AERONAUTICAL SOCIETY – DRONE POLLING

METHODOLOGY NOTE

ComRes interviewed 2,007 GB adults online between 10th and 11th May 2017. Data were weighted to be representative of all British adults aged 18+ by age, gender, region and socio-economic grade. ComRes is a member of the British Polling Council and abides by its rules.

All press releases or other publications must be checked with ComRes before use. ComRes requires 48 hours to check a press release unless otherwise agreed.

For information about commissioning research please contact andrew.hawkins@comresglobal.com or call +44 (0)20 7871 8660.

Table 70

Q.4 To what extent, if at all, do you agree or disagree with each of the following statements?**Summary Table****Base: All respondents**

		Statements					
		Drones can make an important contribution to the UK economy and society	The rules on the use of drones when breached should be more tightly enforced than is the case at the moment	Overall, drones pose more risks than opportunities for the UK	I am less worried about the commercial use of drones than private use of drones	Drones pose more of a safety risk than radio-controlled aircraft which have been around for years	I have a good understanding of the rules and regulations governing the use of drones in the UK
