*Methodology: Savanta ComRes interviewed 2,025 British adults online from the 27th to 28th November 2019. Data were weighted to be demographically representative of all GB adults. All questions were also weighted by 2017 past vote recall and EU Referendum past vote. Voting Intention is also weighted by likelihood to vote. All polls are subject to a wide range of potential sources of error. On the basis of the historical record of the polls at recent general elections, there is a 9 in 10 chance that the true value of a party's support lies within 4 points of the estimates provided by this poll, and a 2 in 3 chance that they lie within 2 points.

	Statements				
	A Conservative government should introduce more tax cuts than the ones they have promised so far	I would be happy to pay more tax in order to help fund a Labour Party promise to compensate women who lost out as a result of changes to the pension age	If the EU and the UK fail to agree to a trade deal by the end of next year, the UK should end the transition without a trade deal and adopt WTO trade rules	I am confident that a Labour government under Jeremy Corbyn would handle the economy competently	I am confident that a Conservative government under Boris Johnson would handle the economy competently
