METHODOLOGY NOTE

ComRes interviewed 1,002 British adults aged 18+ from 9th–13th June 2016. Data were weighted to be representative of all GB adults aged 18+. ComRes sets quotas during fieldwork and weights the raw data on the following demographic information: age, gender, government office region and social grade. The sample includes both landline and mobile telephone numbers. Additionally the data is weighted by past vote recall. The voting intention figures are then modelled using the ComRes Likely Electorate Model to take account for known turnout patterns. ComRes is a member of the British Polling Council and abides by its rules. http://www.britishpollingcouncil.org/
