Q.1 To what extent do you agree or disagree with each of the following statements?

Summary

Base: All respondents

	Statements						
	Rehabilitation is a vital part of the justice process	All prisoners should be able to access opportunities for training and education	Prison should be about punishment not rehabilitation	Increased investment in prison education and training programmes is worth it if crime rates fall in the long-term	Prisoners should have the opportunity to study for advanced (university level) degrees while serving a sentence in prison	By offering prisoners training and education, it significantly reduces the deterrent from committing crimes in the first place	Rehabilitation in prisons is generally ineffective at preventing reoffending
