Savanta

**Role Specification:
Executive,
Advanced Analytics**

Classified: Private

Location: India (Remote)

Business Area: Advanced Analytics

Reports to: Principal Executive

About the Role:

Executive | Advanced Analytics | India, Remote

This position sits within the Advanced Analytics team. The team works on projects across all divisions in both the private and the public sector focussing on drivers analysis, pricing effectiveness, behavioural economics, data transformation, market sizing, portfolio optimisation, trade-off and segmentations.

This role will focus on learning and executing core research skills across a broad range of projects and clients.

Key Responsibilities include:

- **Manipulating and Validating Data:** Routinely process, clean, verify, and prepare datasets from a range of sources to ensure accuracy and readiness for analysis.
- **Analysing Survey Data:** Handle and interpret survey datasets, extracting meaningful trends and contributing to analytical outputs for clients.
- **Applying Statistical Techniques:** Use applied statistics - such as regression, segmentation, key driver analysis, MaxDiff and conjoint - to interpret data and support project insights.
- **Using Programming to Drive Analysis:** Work hands-on with R and Python (and occasionally SQL) to run analyses, automate workflows, and enhance data processing efficiency
- **Leveraging Excel for Data Exploration:** Use Excel confidently for data checking, structuring, exploratory analysis, and supporting project documentation.
- **Communication:** Produce high-quality written outputs and communicate findings verbally in clear, structured English to support both internal and client-facing discussions.
- **Supporting Project Delivery:** Assist team members in ensuring successful delivery of client projects. Work closely with colleagues to obtain clean data in the required formats for analysis.
- **Developing Interactive Data Tools (where relevant):** Contribute to the creation or enhancement of interactive data applications, helping translate analytical results into intuitive tools for clients and internal teams.
- **Applying Project Management Principles:** Demonstrate a strong grasp of project management best practices, operating in-line with the Savanta way of working, and ensure compliance with GDPR and ISO 27001.
- **Monitoring Project Costs:** Remain aware of the importance of tracking and managing project-related costs.

People & Team:

- Develops a good working relationship with other team members.
- Acts as a strong team player.
- Acts as a buddy (if needed to new entry level joiners).

Personal Development/ Profile at Savanta:

- Develop knowledge of the research process.
- Active member of the team and engages in presentations/ discussions in knowledge sharing meetings.
- Embody company values and meet performance expectations.
- Actively owns personal development goals and works closely with managers to achieve them.
- Build a visible profile across the team and wider business.
- Promote global best practices, innovation, and collaborative ways of working.
- Develops full understanding of / compliance with GDPR and ISO 27001 standards.

About You:

An Exec is someone seeking to build their skills by facilitating the work of the wider team, whilst thinking about where and how they will progress.

You will proactively contribute to a variety of tasks, helping the team deliver high-quality outputs for clients. A positive attitude, willingness to learn, and strong work ethic are essential.

You must have strong written and verbal English.

A tech-first mindset is essential as we pivot from a traditional market research business into a cutting-edge technology-first insights company.
